

PHILOSOPHY OF FINANCE

The Board of Education supports an educational philosophy with stated basic aims. We believe that finance must be considered as an integral segment of all educational planning within the bounds of this philosophy.

We believe that the district has the responsibility to determine educational priorities with the needs and capabilities of the community, and that finance has the unique responsibility of providing economic alternatives in the light of district resources.

We believe that in order for finance to function in its proper role the district should develop a structure for evaluation of existing programs and planning for changes, deletions or alternatives to those programs.

The ultimate commitment of finance is to provide information regarding economic alternatives that allows the district to make sound decisions regarding provision of the best education possible for the students in the Vacaville Unified School District.
