

**PHILOSOPHY OF CONTINUATION EDUCATION**

We believe that the philosophy of the district is based upon a strong commitment to providing for students another opportunity for education through an alternative form. We believe that continuation education provides this opportunity and accepts each student as a unique individual who is capable of making a contribution to society.

We believe that continuation education should assist and encourage each student to develop into a productive citizen at the highest level possible within the limits of his ability and personality.

We believe that continuation education should have the student assume responsibility for his life.

We believe that continuation education should provide opportunities to enhance the personal growth of each student.

We believe that continuation education should offer an alternate program that will provide for educational development of each individual and, when completed, will accommodate the requirements for a high school diploma.

We believe that continuation education should provide additional vocational orientation, guidance and opportunities to acquaint the student with the world of work.

We believe that continuation education should assist the student in his preparation for adult roles.
